discover how to streamline complex bioinformatics applications with parallel computing this publication enables readers to handle more complex bioinformatics applications and larger and richer data sets as the editor clearly shows using powerful parallel computing tools can lead to significant breakthroughs in deciphering genomes understanding genetic disease designing customized drug therapies and understanding evolution a broad range of bioinformatics applications is covered with demonstrations on how each one can be parallelized to improve performance and gain faster rates of computation current parallel computing techniques and technologies are examined including distributed computing and grid computing readers are provided with a mixture of algorithms experiments and simulations that provide not only qualitative but also quantitative insights into the dynamic field of bioinformatics parallel computing for bioinformatics and computational biology is a contributed work that serves as a repository of case studies collectively demonstrating how parallel computing streamlines difficult problems in bioinformatics and produces better results each of the chapters is authored by an established expert in the field and carefully edited to ensure a consistent approach and high standard

throughout the publication the work is organized into five parts algorithms and models sequence analysis and microarrays phylogenetics protein folding platforms and enabling technologies researchers educators and students in the field of bioinformatics will discover how high performance computing can enable them to handle more complex data sets gain deeper insights and make new discoveries

economists have long sought to develop quantitative models of economic behaviour which blend economic theory with data evidence econometric modelling of economic time series has strived to achieve this by seeking to discover sustainable and interpretable relationships this important two volume collection focuses on a central method used in selecting such models namely simplification of an initially general model that adequately characterizes the empirical evidence within the investigators theoretical framework the volumes feature a wealth of evidence that has accrued over the last five years displaying its excellent abilities for model selection based on monte carlo studies of automatic algorithms these also throw light on several major methodological issues and prompt many new ideas which are discussed the collection will be valuable to all empirical economists and econometricians
